Hello Sabrina Boothe

An email has just been received from pdf.sn.SYNCDelivery #56773 <delivery@fastlanenet.com> and is suspected to be a "Phishing" email. The email message is safely quarantined.

The email subject is: **New FaxDelivery from 80838972362**

Email attached files are:

Detection reasons are:

- Email body includes suspicious text format
- The email was sent from a domain with low traffic
- Email authentications protocol signature is weak
- Sender does not have established reputation
- Link in email has suspicious format
- Email subject includes suspicious text or text format
- Email body language indicates potential phishing attempt
- Email subject includes suspicious text

If you wish to request to release it from quarantine, [click here](#) or contact your system administrator.

You may be required to authenticate, in that case follow these instructions:

1. You will be directed to a page where you would be requested to specify your email address.
2. An email with verification code will be sent to you.
3. Copy the code and return to the email recovery page.
4. The email will be released to your mailbox.

**Please exercise discretion when requesting to release suspicious emails.**

You can read more about phishing attacks [here](#).
